Starting up the DC9723 (Israel) Group

(at 4:13 pm ([Uncategorized](#)) 18/11/2010)

Hi Everyone!

We (iamit, itzik) are really excited to start a DefCon group in Israel. We are calling it DC9723, and we plan to have our first meeting on December 21st.

Save the date!

This is a DefCon group. This means that we will have a meeting of any kind. We plan to have the meeting at a pub, and anyone can present their research/ramblings.

On Tuesday, December 21st, we will have our first DC9723 meeting. Feel free to propose talks for the meeting (send to info@dc9723.org), we will probably go over some of the "formalities" of the newly established group to make sure that everyone is up to speed, and describe what we have in mind in terms of short and long term goals for the group.

The meeting will be at the [Leo Bloom's](#) pub at Ramat HaChayal, at 6:00pm. The address is 24 Raul Valenbergs st. Ramat HaChayal, Tel-Aviv.

Looking forward to seeing you all there!

Feel free to RSVP through Facebook or LinkedIn:

Update 11/23/2010: Due to the overwhelming response (and we trust that all confirmed attendees will actually show up, we currently have over 60!), we are looking for alternate venues. We are currently in touch with the IDC (Interdisciplinary Center) in Herzlya, as well as other organizations, and hope to bring you back an updated location soon!

Next Meeting: December 21st, 2010

The image shows a screenshot of the BSidesLV 2018 website. At the top, it displays the date "August 7 - 8" and the location "Las Vegas, NV". Below this is the main logo for "BSIDES LAS VEGAS", featuring the word "BSIDES" in large green letters and "LAS VEGAS" in smaller letters next to a silhouette of the Las Vegas skyline. The background of the page features a photograph of the Las Vegas Strip at night. At the bottom, there are two orange rectangular buttons with white text: "OUR SCHEDULE" and "BADGES".

Señor

Sea esta la ocasión para saludarlo y a la vez felicitarlo por sus reconocidos logros en los campos de seguridad informática y en su vida laboral internacionalmente reconocida.

El Frente 42 Manuel Cepeda Vargas de las FARC-EP, Bloque Oriental, que opera principalmente en el departamento del Valle del Cauca y la ciudad de Cali, le informa que desea aprovechar su próxima visita al país para iniciar una relación a largo plazo y de beneficio mutuo con usted.

En nuestra labor diaria de combatir la opresión y la corrupción que mantiene a nuestro pueblo esclavizado por la oligarquía, bajo un gobierno imperialista y narco-paramilitar, es de gran importancia para nuestra organización mantener relaciones de confianza con asesores expertos que ayuden a proteger nuestras comunicaciones y información secreta, como usted y otros expertos seleccionados lo puede hacer.

Si usted desea colaborarnos como se le pide, dentro del aeropuerto de Bogota o el de Cali dependiendo de sus vuelos, en inmigración, se le acercará un oficial de la Policía Nacional uniformado, que le entregará un papel con un teléfono. Cuando este totalmente solo en su habitación del hotel o villa, llame a ese celular para recibir las instrucciones siguientes, y para coordinar su recogida y retorno seguro al hotel o al evento.

Si usted decide no viajar a Colombia o no hace el contacto apropiado con nuestro hombre en el aeropuerto o no realiza la llamada al celular que se le pide, entenderemos que usted es afin al gobierno opresor y como tal pasará a ser objetivo militar de nuestras milicias urbanas en Cali y sus alrededores, y serán perseguidos, así como los individuos ya identificados que trabajan con el ejercito y la inteligencia de las fuerzas militares sanguinarias de Colombia.

La orden de realizar este contacto viene del Estado Mayor del Bloque Oriental (embo) de las FARC-EP, en las montañas de Colombia, y debe ser cumplida sin demora. Otros invitados del evento también están pedidos como asesores, para acompañarlo en nuestra relación.

Amazon EC2 C5/C5d and M5/M5d instances are built on the Nitro system, a collection of AWS-built hardware and software components that enable high performance, high availability, high security, and bare metal capabilities to eliminate virtualization overhead. With the latest set of enhancements to the Nitro system, we have increased the maximum EBS-optimized instance bandwidth to 14Gbps, up from 9Gbps and 10Gbps for C5/C5d and M5/M5d respectively. We have also increased the maximum EBS-optimized instance IOPS for Nitro systems to 80,000 IOPS, up from 64,000 IOPS and 65,000 IOPS for C5/C5d and M5/M5d respectively. In addition we have increased the EBS-optimized instance burst performance on the large, xlarge and 2xlarge C5/C5d and M5/M5d instances to 3.5Gbps, up from 2.25 Gbps and 2.12 Gbps respectively.
